

GROTABS

Grotabs are a very slow-release fertiliser (up to two years subject to environmental conditions) in an easy-to-use tablet form.

Simply place the tablet in the ground alongside the young seedling and the seedling's roots will draw nutrition from it!

Grotabs come in a packet of 100 or 1000 tablets for your convenience.

The shelf-life of grotabs is well in excess of two years when stored in an air-tight container in a dark, dry area.

Do not leave where animals or young children can access them – they should not be consumed.

Grotabs are suitable for any tree or shrub. They release the nutrients when the ground is moist, and therefore when the plant is growing and in most need of nutrients.

Ingredients include:

- 20% Total Nitrogen (N) present as urea formaldehyde.*
- 7% Water soluble Nitrogen (N).*
- 13% Water insoluble slow-release Nitrogen (N).*
- 4.3% Total Phosphorous (P) present as citrate soluble from calcium phosphates.*
- 4.1% Total Potassium (K) present as sulfate of potash.*
- 2.6% Calcium (Ca) present as calcium phosphates and calcium sulfate.*
- 1.6% Sulfur (S) present as calcium phosphates and calcium sulfate.*
- 0.5% Iron (Fe) present as ferrous sulfate.*
- 0.6% Biuret (Maximum).*
- 0.5% Magnesium (Mg) as oxide.*
- 0.05% Manganese (Mn) as sulphate.*
- 0.05% Copper (Cu) as sulphate.*
- 0.05% Zinc as sulphate.*
- 0.05% Boron as sodium borate.*
